

Hengyi (Henry) Zhou

hengyizh@umich.edu [Website](#)

SUMMARY

I am a highly motivated dual degree student in mechanical engineering (SJTU) and computer engineering (Umich), interested in robotics (both algorithm and hardware). I plan to explore the interdisciplinary area and apply for a Ph.D. degree in the future.

EDUCATION

University of Michigan

Bachelor of Computer Engineering (Expected)

- Overall GPA: 4.00/4.00

Ann Arbor, MI

Aug. 2025 – May 2027

Shanghai Jiao Tong University (SJTU)

Bachelor of Mechanical Engineering (Expected)

- Overall GPA: 3.81/4.00, rank top 10/69

Shanghai, China

Aug. 2023 – May 2027

EXPERIENCE

Undergraduate Research Intern at the [lab](#) led by Prof. Ye Zhao

Project:

- RL fine tune for dextrous manipulation

Aug. 2026 – present

Georgia Tech

Undergraduate Research Intern at the [lab](#) led by Prof. Sean Huang

Project: Kresling Origami Sensor

- Lead the project, ongoing

Jul. 2026 – present

Umich

Undergraduate Research Intern at the [lab](#) led by Prof. Sean Huang

Project: Self-Consistent Neural Control

- Lead the project
- Under review by AAAI 2027

May. 2026 – present

Umich & UCLA

Undergraduate Research Intern at the [lab](#) led by Prof. Sean Huang

Project: Neural Control: Adjoint Learning Through Equilibrium Constraints

- Modified neural network architectures to adapt to the control task
- Conducted large-scale experiments and benchmark comparisons to evaluate model performance
- Accepted by ICML 2026

Jan. 2026 – May. 2026

Umich

Undergraduate Research Intern at the [lab](#) led by Prof. Chao Li

Project: A Prefetch-Enhanced Cache Reuse System for Low-Latency RAG Serving

- Designed and implemented elimination algorithms
- Conducted extensive experiments and benchmark comparisons
- Accepted by TACO(ACM Transactions on Architecture and Code Optimization)

Jan. 2025 – Jun. 2025

SJTU

PROJECTS

ME3500J Project | Solidworks, Python, Raspberry Pi

May 2025 – Aug. 2025

Project: ME3500J Project – A Self-locking Multi-Diameter Cylindrical Column Climber

- Designed an dual-wheel stabilization structure by SolidWorks and 3D-printed, which can climb stably on rough surfaces
- Wrote the control programs and debugged on Raspberry Pi
- Wired, soldered, assembled, and tested the climber
- See the demonstration video for more information on <https://youtu.be/lMugocoG81E>

TEACHING EXPERIENCE

Grader for Intro to Signals and Systems	Jan. 2026 – May. 2026 <i>Umich</i>
Teaching Assistant for Intro to Engineering <i>Lecturer: Prof. Yanfeng Shen</i>	May 2025 – Aug. 2025 <i>SJTU</i>

HONORS & AWARDS

Wang Chu Chien-Wen Research Award <i>University of Michigan</i>	Apr. 2026
Jackson and Muriel Lum Scholarship & Fellowship <i>University of Michigan & Shanghai Jiao Tong University</i>	Jul. 2025
Yu Liming Scholarship <i>Shanghai Jiao Tong University</i>	Nov. 2024
Mathematical Contest in Modeling – Honorable Mention <i>Consortium for Mathematics and Its Applications</i>	Jun. 2024

TECHNICAL SKILLS

Languages: C/C++, Matlab, Python
Tools: Git, SolidWorks, WaveForm, Arduino, CubeIDE, Keil5, LabVIEW, Mathematica
Libraries: pandas, NumPy, PyTorch, JAX

EXCHANGE

University of Navarra <i>Courses Taken: Espanol inicial: Comunicación y Cultura, Software Engineering</i>	Jan. 2025 – Feb. 2025 <i>Navarra, Spain</i>
Korean University <i>Courses Taken: Introduction to Artificial Intelligence, Korean Entertainment</i>	Dec. 2023 – Jan. 2024 <i>Seoul, South Korean</i>

SERVICES

Minister of the JI Youth Volunteer Team <i>Shanghai Jiao Tong University</i>	May 2024 – May 2025 <i>Shanghai, China</i>
Student Advisor in UMJI Advising Center <i>Shanghai Jiao Tong University</i>	Mar 2025 – present <i>Shanghai, China</i>
